A  
Prognostication,  
in which you may  
behold the state of  
this yeare of our  
Lord God  
1626.

---

Being the next after  
the Leape yeare.

---

Made and set forth by  
*William Dade Gent.*

---

LONDON  
Printed for the Company  
of Stationers.  
1626.

# The begining and ending of the Termes this present yeare 1626. with their Returnes.

**Hilary Terme**, beginneth on the 23. of January, and  
both end on the 13. of February, & hath 4. Returnes

- |                         |                       |
|-------------------------|-----------------------|
| 1. Octabis. Hillarie. } | 3. Crasti. Purifica.  |
| 2. Quind. Hillarie. }   | 4. Octabis. Purifica. |

**Easter Terme**, beginneth the 26. of April, & endeth  
the 22. of May, and hath 5. Returnes.

- |                    |                    |
|--------------------|--------------------|
| 1. Quind. Pasch. } | 4. Quinque. Pasch. |
| 2. Tres Pasch }    | 5. Crasti. Ascen.  |
| 3. Mense Pasch.    |                    |

**Trinity Terme** beginneth the 9 of June, and endeth  
the 28. of July, and hath 4 Returnes.

- |                   |                 |
|-------------------|-----------------|
| 1. Crast. Trin. } | 3. Quind. Trin. |
| 2. Octab. Trin. } | 4. Tres Trin.   |

**Michaelmas Terme** begins the 9. of October, and  
endeth the 28. of November, and hath 8. Returnes.

- |                        |                       |
|------------------------|-----------------------|
| 1. Octabis. Michael. } | 5. Crast. Animarum.   |

| 3. Tres Michael. }     | 7. Octabis. Martini.  |
| 4. Mense. Michael. }   | 8. Quind. Martini.    |

Note also, that the Exchequer openeth  
eight dayes before any Terme begin (ex-  
cept Trinity Terme) in which it openeth  
but sower daies before.

A true discription of the  
four Quarters of this yeare 1626.  
And first of Winter.

☉ in ♍. ☿. ♄.

**W**inter ( according to our English account ) began the Twelfth day of December, in the yeare passed, 1625. at which time the Sunne entred into the first minute of the Celestiall Signe *Capricornus*, making the shortest day, and longest, night in the yeare, which Quarter is naturally cold and moyst. When the Sun is in *Capricorne*, cold reigneth more then moysture; And in *Aquarius*, it is equally cold and moyst. The Sun bieng in *Pisces*, it is more moyst then cold; and for the most part store of wind is stirring, especially in the midst of VVinter.

The Diseases subiect to this Quarter, are cold Flegmaticke and Melancholy sicknesse, as Scabs, sore eyes, Melancholy Rheumes, Coughes, Cathars, Sciaticaes, much sicknes amongst VVomen, &c.

### A Prognostication.

For the iudgement of the weather, you may see it in the daylie disposition of each Month hereafter following.

---

#### Of the Second Quarter of the year, *called the Spring.*

☉. in ♋. ☿. II.

**T**He Spring (according to our Astronomi-  
call account) beginneth this year vpon  
the tenth day of March, when the Sun entrench  
the first minute of *Aries*, making the vernall  
Equinoctiall, the daies and nights of equall  
length throughout the whole world; and in  
generall is of nature hotte and moist, but very  
vncōstant, at sometimes raine, sometime hot,  
and sometimes cold. The cold of winter is  
now diminished, and the pores of the earth  
which haue ben long shut vp and bound with  
cold, are now loosened, by reason of the  
Suns approaching toward our Verticall Cir-  
cle; and moisture often faileth by reason of  
the needrenesse of Winter. In the beginning  
(the Sun being in *Aries*) the weather incli-  
neth more to moysture then heate; and in the  
middle (the Sun being in *Taurus*) it is equall  
for heate and moisture, as sometimes hot, and  
sometimes shewie; and in the end of this  
Quarter

Dade. 1626.

Quarter (the Sun being in *Gemini*) it is more hot then moist. In this Quarter vsually there are many sodaine stormes of wind, by reason of the meane temperature of the Ayre.

The Sickneses of this Quarter, are small pockes, Measels, Scabs, many hotte diseases proceeding of corrupt blood, as Feuers, &c.

---

Of the third part of the yeare called  
*Summer.*

☉. in ♋. ♌. ♍.

**S**ummer beginneth the twelfth day of *June*, at that time when the Sun entreth into the first minute of *Cancer*, and finisheth his greatest North declination, making the longest day and shortest night in the yeare : which Quarter (according to his naturall disposition) is hot and dry. In the beginning (the Sun being in *Cancer*) heate ruleth more then drynes; and in the middle (the Sun being in *Leo*) it is more dry then hotte. And for the most part there are small store of winds stirring this Quarter, especially in the midst of Summer.

The diseases of this Quarter, are hot burning Agues, Scabs, Pustules, Iaudies, griefe of the head and backe, &c.

## A Prognostication.

Of the fourth part of the yeare, called  
Autumne, or Haruest.

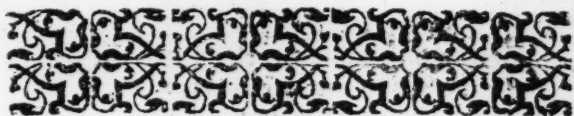

☉. in ♎. m. 7.

**H**Aruest, or Autume being our last Astro-  
nomicall Quarter of this yeare, begin-  
neth at the entrance of the Sunne into the first  
minute of *Libra*, making the daies and nights  
of equall length, which happeneth vpon the  
23. day of September.

This Quarter (according to his naturall  
quallity) is cold and dry; The Sun being in  
*Libra*, is more dry then cold; and the Sun in  
*Scorpio*, is equally cold and dry, and in the lat-  
ter end (the Sun being in *Sagitary*) it is more  
cold then dry. In Autumne (as in the Spring)  
there are many boystrous winds often stirring,  
and it is dangerous for most diseases which  
are now apt to be taken, and least remedy for  
the same.

The sicknesses are diuers of this Quarter, as  
Crampes, Toothach, Rheumes, Hoarsnesse,  
Coughes, Melancholy, Fluxes of Blood, Fal-  
ling-sicknes, grieve in the Backe and Kid-  
nies, &c.

A

A briefe description how the Planets are  
placed aboue the Earth in the Skie, for euery  
*moneth after Sunne setting, or before his rising, by*  
which you may perceiue how they keepe their motion  
day and night all the yeare. Moreover, the new, full  
and Quarrers of the Moone; with Astro-  
logicall iudgement of the weather  
for each day of the yeare. Also  
Husbandry instruction for  
each moneth of  
the yeare.

---

### January.

{ Saturne, is neere mid-heauen at Sun setting.  
Iupiter is in mid-heauen at Sun setting.  
Mars is in mid-heauen at Sun rising.  
Venus setteth a while after the Sun.  
Mercurie riseth before the Sun. }

**T**he first day wet.  
Full Moone on Monday the 17. day, 28 min.  
after hie-noone.  
The 11j. and 11ij. faire.  
The 6. 6j. and 6ij. frost.
